One team for the software a business runs on

Digihub Software Company (SMC-Private) Limited is a software engineering company that has operated since 2015. It implements and customizes Odoo ERP, builds custom software, web and mobile applications, integrates AI into business workflows, runs cloud infrastructure, and provides SEO and paid-advertising services.

Because ERP, custom software, the website and marketing come from the same team, the order that starts on your website can land in your ledger without a second vendor, and one contract covers the whole system.

— A MESSAGE FROM OUR FOUNDER & CEO

We start with the problem, not the code

Most businesses don't come to us for software. They come because something is slowing them down: numbers nobody trusts, orders typed in twice, or a system that grew in the wrong direction.

Our job is to understand that problem before we write a line of code, to tell you honestly when you don't need something, and to put the price and the scope in writing before you pay.

Since 2015 that way of working has carried us through more than 100 projects for businesses in the UK, Pakistan and the UAE. If you are weighing a project, I'd be glad to hear what you're trying to fix.

Syed Abbas Ali

Founder & CEO, Digihub Software

Why we do this work

Our vision

To be a software partner that businesses anywhere can trust: building systems that make work simpler, decisions clearer and growth easier to manage.

Our mission

To deliver reliable, well-engineered software that solves real business problems and keeps creating value long after launch.

7 service areas, with published prices

Every service has fixed-price packages, so you can see what a project costs before the first call.

Odoo ERP

Odoo consulting, implementation, customization, migration, integration and support.

From \$2,400 per project

Website Development

Custom, WordPress, Shopify and headless websites and online stores, built for speed, search and conversion.

From \$799 per project

Custom Software Development

Business software, SaaS products, management systems, APIs and integrations designed around your workflows.

From \$1,200 per project

AI & Automation

Practical AI: assistants, document processing, search, LLM integration and agentic workflows connected to your systems.

From \$1,500 per project

Mobile App Development

Android, iOS and cross-platform Flutter apps with the backends and APIs behind them.

From \$6,500 per project

Digital Marketing

Technical and content SEO, Google Ads, Meta and LinkedIn advertising, and conversion-focused content.

From \$179 per month

Cloud & DevOps

Cloud architecture, migration, containers, CI/CD, server management and infrastructure security.

From \$1,200 per project

Systems we build and implement

ERP and business management

One system for finance, inventory, purchasing, sales and HR, instead of separate spreadsheets.

CRM

Leads, follow-ups and customer history in one place, so sales teams know what to do next.

Healthcare and laboratory

Sample tracking, results and reports for laboratories, clinics and hospitals.

Restaurant management

POS, orders, table bookings and kitchen tickets in one connected system.

Odoo ERP

Implementation, customization, migration and support for Odoo, set up around how your business runs.

School management

Admissions, fees, attendance, exams and parent communication for schools and colleges.

Distribution management

Order booking, van sales, stock and recoveries for distributors and wholesalers.

Manufacturing and inventory

Bills of materials, production orders and stock levels you can trust.

A registered company you can check

Digihub is a private limited company in Pakistan, registered with the authorities below.

SECP

Securities and Exchange Commission of Pakistan

Incorporated as a private limited company (SMC-Private) under Pakistan's Companies Act.

Corporate Unique Identification No. (CUIN)
0308353

Federal Board of Revenue
Revenue Division - Government of Pakistan

FBR

Federal Board of Revenue

Registered taxpayer with a National Tax Number.

National Tax Number (NTN)
H505247

PSEB

Pakistan Software Export Board

Registered IT and software export company.

Registration No.
Z-25-17805/25

Partner

Hostinger Partner

Official partner status with Hostinger for web hosting.

We also build on Shopify and WordPress and manage Google Ads campaigns for clients. These are platforms we work with, not official partnerships.

What working with us looks like

01

Fixed prices, in writing

Published packages and a written scope before work starts. Anything outside it is quoted first.

02

Paid stage by stage

An advance books the work and each stage is paid before it starts. The final payment comes before go-live.

03

Tested before launch

You review the real system on a private staging site and approve it before it goes live.

04

30 days of free fixes

After go-live, anything we built that doesn't work as agreed is fixed at no charge for 30 days.

[Read the payment policy](#) · [See all prices](#)

Our core beliefs

01

Innovation

We try new ideas and technologies when they make a solution genuinely better, not because they are new.

02

Integrity

Honest advice, transparent pricing and written agreements, including telling you when you don't need something.

03

Customer success

Your results are how we judge our work. We do well when the businesses we serve do well.

04

Quality

Care in every line of code: version control, a staging site and testing before anything goes live.

05

Impact

Software should make a visible difference to how a business runs and how its people work.

About Digihub

Is Digihub a registered company?

Yes. Digihub Software Company (SMC-Private) Limited is incorporated with the Securities and Exchange Commission of Pakistan (SECP), registered with the Federal Board of Revenue (FBR) and registered with the Pakistan Software Export Board (PSEB). Our SECP CUIN is 0308353, our NTN is H505247 and our PSEB registration number is Z-25-17805/25.

Where is Digihub based, and which countries do you work with?

Our office is in Peshawar, Pakistan. Most of our clients are in the United Kingdom and Pakistan, and we also work with businesses in the UAE. Work outside Pakistan is delivered remotely, with calls arranged in your working hours.

How long has Digihub been in business?

Since 2015. In that time we have delivered more than 100 projects across ERP, software, websites, mobile apps and digital marketing.

How do payments work?

Projects are paid in stages: 50/50 for projects under \$2,000, otherwise 40/30/30, with the final payment before go-live. The source code is handed over once the project is paid in full, and the first 30 days after go-live include free fixes. Our payment policy has the details.

Can I share this company profile with my team?

Yes. Download the PDF from this page and share it with anyone involved in the decision. It contains the same information as this page.
